-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 February 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The abstract of the disclosure is objected to because the use of parentheses is not proper for US patent practice. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lawrence US patent 6,216,747.

'747 discloses a beam let-off apparatus used with weaving or knitting machines. Dancer roll 7 corresponds to the recited, "deflection roller" and "measuring roller". Dancer roll 7 is mounted to frame by the counterweighted pivoting arms 8 at pivot points 13. Weights 9a and 9b can be attached to arms 8 to adjust the tension applied by the weight of the arms and roll 7.

Signaling rod 11 is slidably mounted to arm 8 by collar 14 and pivotably attached to switch 12. This attachment corresponds to recited, "force measurement bearing".

The switch 12 can be a limit switch, starting the drive means for roll 2 when arms 8 and therefore rod 11 are raised due to high tension and stopping the drive means when arms 8 and rod 11 are lowered due to low tension. Rod stops 15a and 15b are set to predetermined limits of yarn tension depending on the type of materials being woven (claim 12). These items can be considered the control unit (switch, rod stops, weights, rods).

'747 discloses embodiments with guide rolls to both sides of the dancer roller as recited in claim 13.

Figure 2 shows rollers 10, 16, and 6 that serve as length compensation devices. They are also in a jockey setup (figure 4) and so-called spring compensation roller (fig. 3b) as recited. The rollers of the device are all mounted pivotally and are angularly displaced in reaction to the spring loaded (17a and b) signaling rod 11.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Muromoto, Jr. whose telephone number is 571-272-4991. The examiner can normally be reached on 8-530, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on 703-305-1025. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
